Advanced Office Installations

Miguel Marrero

37 Lukens Drive

New Castle, DE. 19720

Dear Mr. Marrero,

Douron has been very pleased and satisfied to have been working with your company over the past 5 years. From the complete outfit of new furniture to complete North Salisbury Middle School and many others just like it, to complete library shelving jobs that included mobile shelving systems and the countless number of systems installations and reconfigures we have worked together on. I would also like to thank your company for the outstanding job your installers did on the Fort Bragg project in Fayetteville, North Carolina. Douron was challenged to complete 7 new buildings full of systems furniture as well as high end case goods and storage shelving. With the help of AOI all 7 buildings were completed on time and the end user could not be happier. It has been so easy to deal with an installation company that is so versatile to handle the many different product lines Douron sells. I will have no problem recommending AOI to any other furniture vendors or customers and we look forward to working with you in the future.

Sincerely,

Chad Blankenship

Senior Project Manager
